

FAASTeam presents:

1-800-WX-BRIEF: More Than Just a Phone Number

Lockheed Martin is best known for providing flight service station functions and weather briefings for pilots via phone. Did you know that they have an online site, www.1800wxbrief.com, where you can obtain an online weather briefing, file a flight plan and more? If you have used services like DUATS and DUAT in the past, you may be quite pleasantly surprised how different the weather information is presented to you. Their extensive use of graphics and tailored weather analysis makes interpreting weather advisories, forecasts and observations much easier. In this safety seminar, Herb Patten will review the nextgen weather briefing options available from www.1800wxbrief.com. Herb Patten is an FAA certificated advanced and instrument ground instructor who teaches private pilot ground school at San Carlos Flight Center. He holds a private pilot certificate with an instrument rating, has over 700 hours and flown into 111 different California airports. He is co-founder of the Bay Area Student and New Pilot Support Group, and a board member of the Upwind Foundation, famous for its Upwind Summer Scholarship Program. When not giving presentations he can be found in the air pursuing his aviation interest or supporting others in their flying adventures. San Carlos Flight Center was voted Best Flight School in the US in
